

WHEN HEALTH MEETS WEALTH

Understanding the benefits of long-term investing.

With a Cigna Choice Fund® Health Savings Account (HSA), investing for the future is an important benefit available to you. In addition to using your HSA funds for qualified medical expenses, your HSA gives you the option to invest your money for potential long-term savings and tax advantages. It's an easy way to start – or add to – your investment portfolio.¹

We are here to help you learn about the power of your HSA so you can make the right choices for you and your family. Let's begin with a refresher on how to use your HSA and visit some of the key decision points.

Key information about investing in your HSA

Having an HSA investment account lets you use your contributions to help build and grow additional income for your future.

- Like a 401(k) or IRA retirement account, HSA investment earnings are tax-deferred. If you use them to pay for eligible health care costs, they are also free from federal and most state income taxes.²
- In some cases, HSAs provide a higher annual contribution limit than IRAs. If you're age 55 or older, you can make an added catch-up contribution up to \$1,000 in the calendar year.
- You can move your HSA investment funds back into your HSA cash account at any time to pay for your current qualified health care expenses (unlike a 401k or IRA).

* You must first reach the minimum amount to open an HSA investment account. The minimum balance required will be disclosed by the bank used for your HSA.

** After age 65, funds can be withdrawn for any purpose without penalty but may be subject to income tax if not used for qualified health care expenses.

Why should I consider investing?

An HSA investment account can be a great way to help you prepare and save for your future or save for unexpected health care costs.

You can take advantage of many benefits, including:

- Potential long-term savings – much like a 401k or IRA
- Tax-exempt contributions – all contributions and gains are exempt from federal and most state taxes while invested²
- Tax exempt withdrawals² – as long as the money is used for eligible health care expenses or to reimburse yourself when you've paid for such expenses using your personal funds
- Easy-to-use online investment platform, available 24/7
